HUMAN CRANE - INTRODUCTION

HumanCrane was designed and produced by stYpe with the goal of introducing to the market a crane that eliminates the usual problems that occur when trying to make crane shots involving Virtual or Augmented Reality. HumanCrane's shape was developed using the newest FEM simulation technologies. The elliptical arm profile of human crane is proven to be optimal for minimizing bending for typical camera crane moves. Unlike other cranes, each joint of HumanCrane can be leveled easily and precisely, which is very important for professional level virtual effects. The head of HumanCrane can be purchased separately, as it features the standard Mitchel mount. HumanCrane head motors are waterproof, backlash-free, and have extremely smooth operation on slow speeds, providing probably one of the best motion controls among light-weight crane camera heads.

USE ON TV AND FILM SETS

HumanCrane is a highly precise crane built from scratch with virtual effects in mind. Great for indoors & outdoors, is waterproof, backlash-free, ensuring extremely smooth operation.

TECHNICAL SPECIFICATIONS

ARM REACH	NO. OF EXTENSIONS	PAYLOAD
2 m	1	22 kg
...
12 m	11	22 kg
*other sizes available on request		

Using the newest FEM simulation technologies, elliptical arm profile of human crane is proven to be the optimal profile for minimizing bending for typical moves of a camera crane.

Combining the modern design with a high grade pan & tilt bearing systems, Human Crane design is built for AR/VR applications right from a start and it is a perfect match for Stype Kit.

TECHNICAL SPECIFICATIONS CRANE HEAD "HUMAN HEAD"

HEAD OPTIONS	2 and 3 axis head
MOUNT TYPE	Mitchell mount
PAYLOAD	30 KG
SPEED	180°/second
PAN REACH	360°
TILT REACH	360°
HOLE SIZE (cables)	5 cm
WEIGHT	5.1 kg
WARRANTY	1 year warranty

"Human Head" is as smart as its name suggests. We designed it having AR/VR applications in mind so each joint can be adjusted or leveled easily.

This head has a standard mitchel mount, so it can also be mounted on other types of cranes, as well as telescopic ones and provide a user with all Stype Kit features such as automatic focusing and aiming. Since the head is waterproof this makes it ideal for outdoor shooting as well as indoor.

Motors for the "Human Head" are waterproof, backlash-free, and have extremely smooth operation on slow speeds, providing probably one of the best motion controls among light-weight crane camera heads.
